Subject: Rotapanel EN12966 certified

Sittard, 13 October 2022

Dear Mr. Born,

The **only current valid version** of the EN12966 is the version **EN 12966-1:2005+A1:2009**

This version is the only version that SGS INTRON Certificatie BV, as your notified body, are able and allowed to write certificates of constancy of performance to.

That is because the new version of the EN12966, which is EN12966:2014 + A1:2018, is not yet published in the OJEU (Official Journal of the European Union).

The **rotating prism** variable message signs that Rotapanel International BV produces however, are in compliance with the demands of this new version EN12966:2014 + A1:2018

And physical/mechanical tests in the 2018 version are equal to those in the 2005 version.

Kind regards

A handwritten signature in blue ink, appearing to read 'Wil Ubachs', with a horizontal line underneath.
